Stormwater pollution has become a major concern both locally and nationally. Ultra-Drain Guard combats this issue by removing waste from stormwater before it can become a problem in the water system. It's geotextile fabric and easy installation make it ideal for industrial facilities, construction sites, and parking lots where stormwater runoff is likely to carry oil, eroded soil, debris, and fuel contaminants.

Ultra-Drain Guard exceeds an 80% sediment removal efficiency and helps comply with NPDES, 40 CFR 122.26 (1999) when used as best management practice in storm water pollution prevention plans.

ADVANTAGES:

- High flow / high strength outer filter
- Filter media composed of 100% recycled, shredded tires
- US Patented
- Weight of unit holds it securely to curb surface
- Ultra-Drain Guard Plus model includes X-TEX filter strips to increase oil and grease absorption
